

NUTRIENT & MICROBIAL PLANTER BOX DELIVERY SYSTEM

CORN ELITE

GSS Corn Elite with Ether, Guard C, Guard X, and Prephyte ST is an advanced planter box system that combines seed fluency, micronutrients and live biology in a convenient delivery system that can replace any seed fluency agent.

The patented Bio-Capsule™ Technology delivery system allows for the addition of multiple biological solutions safely packaged for convenient, live deployment at planting.

Ether Enzyme Technology kick-starts the uptake of available soil nutrients and water while maximizing microbial activity.

PRODUCT BENEFITS

- IonLock[™] Zinc increases singulation & adheres microbes to seed coats while providing valuable early emergence nutrition
- Increases early-season iron, manganese and zinc uptake
- Puts corn plants in the position to manage season-long stressors and optimize genetic potential
- Guard C: contains active Fungal Chitosan with three modes of action to suppress nematodes and seed/seedling diseases
- Guard X: repels corn rootworm (CRW) at the root & activates the plant's immune system to efficiently withstand abiotic stresses
- Prephyte ST: protection against many soil-borne diseases, freeliving nematodes and abiotic stresses

Guard X

A multiple-mode-of-action

indirect bioinsecticide to mitigate

corn rootworm damage

Prephyte ST

Broad-spectrum, EPA-registered fungicide for prevention, control or suppression of many soilborne diseases.

Guard C

Nematicide to suppress nematodes and stimulate plant development

DIRECTIONS FOR USE & RECOMMENDED USE RATE

DO NOT ACTIVATE BIO-CAPSULE UNTIL READY FOR USE. Read and follow all label directions for use on package. Once ready to plant, remove the safety clips from the Bio-Capsules. Push down on the buttons atop the pail to release the biologicals into the base. Seal the pail and shake aggressively to blend the contents. Before each application, aggressively shake contents to ensure the correct volume is applied.

The combined products (1 pail) treat 50 units of corn at 80k seeds per unit.

For single-row unit planters, use the enclosed scoop to measure out blended contents. One scoop treats 1 unit (80k seeds) corn.

PRODUCT AVAILABILITY
