

NUTRIENT & MICROBIAL  
PLANTER BOX DELIVERY SYSTEM

# SOYBEAN ELITE

Guard C™ is seed treatment containing the active ingredient Fungal Chitosan, offering 3 modes of action to protect against soil-borne disease as well as free-living nematodes while stimulating root and plant growth.

Guard C can be used as a planter box application through Meristem's patented BIO-CAPSULE™ Technology.

## GUARD C FEATURES

- One-of-a-kind Pharma grade Fungal chitosan that delivers more consistent performance compared to crustacean based chitosan.
- Three Modes of Action against Soil-Borne Disease
- Better Together – Complimentary when paired with PrePhyte ST and or synthetic seed treatments.
- Fungal chitosan has a strong positive charge which pulls in nutrients for uptake

## GUARD C BENEFITS

OFFERS 3 modes of action to combat nematodes & seed/soil disease

STIMULATES root & plant growth while defending against pathogens

PROVIDES stronger & healthier emergence

### Guard C Disease Defense + Biostimulant

Guard C's active ingredient Fungal chitosan offers 3 modes of action to combat pathogens while stimulating root and plant growth.

Guard C has shown excellent results on controlling Fusarium, whereas traditional animal chitosan shows very little results (above).

## Co-packed with Guard C™

CONTROL

TREATED

Ether™ Enzyme Technology kick-starts the uptake of available soil nutrients and water while maximizing microbial activity, containing Lipase & Mannanase enzymes that boost biological activity & activate nutrient availability.

## ETHER ENZYME TECHNOLOGY BENEFITS

MAXIMIZES microbial activity

UNLOCKS nutrients & accelerates nutrient & water uptake

SUPPORTS early vigor & stronger plant establishment
